Agent-first full-stack engineer, current on the latest models, coding agents and harnesses, focused on building agentic workflows and pipelines (parallel agents, MCP tooling, automated review, evals) that dramatically speed up delivery.

Experience

Wolfpack Digital Sept 2025 – Present
Full-Stack Engineer *Cluj-Napoca, Romania*

- Lead engineer on cashli.io, a US fintech app; scaled the API and database to 200k+ requests per week.
- Lead engineer on fleetwitness.co.uk, a fleet monitoring SaaS serving tens of clients with thousands of trucks; architected new features fully on AWS.
- Full-stack work across client projects, including agentic LLM chatbots for the Wolfpack AI estimator.

Full-Stack Developer Intern *June 2025 – Aug 2025*

- Built and tested Ruby on Rails and JavaScript features for a food shopping app: REST APIs and database models.

Freelance, RNGO.ro Dec 2024 – Present
Full-Stack Engineer *Cluj-Napoca, Romania*

- Built and run a full-featured car rental platform for a Cluj-based business: booking with tiered and seasonal pricing, airport transfers (Mapbox), bilingual UI, and a realtime admin dashboard (Next.js, Convex, Clerk).
- Long-running client collaboration: ongoing feature work, maintenance, and deployment ownership.

Projects

more at mihaicrisan.com

Busu Cluj | *Swift, SwiftUI, MapKit, Convex, TypeScript*
https://busu-cluj.app

- Real-time public transport app for Cluj-Napoca: live positions for 430+ vehicles every 20s, arrivals, timetables.
- Convex backend syncing GTFS from the Tranzy API with three-tier caching, polling gated on active viewers.

Zalem (Bachelor Thesis) | *Next.js, TypeScript, Convex, AI SDK*
https://zalem.mihais-vps.xyz

- Built a shopping chatbot the right way, context engineering first: classical algorithms shortlist products, the LLM only re-ranks and explains, and every claim is hydrated from the live catalog by ID.
- Raised factuality from 0.53 to 0.76 with grounding and citation validation, measured by Promptfoo evals.

Nara (Document Q&A Platform) | *Next.js, Convex, Python, FastAPI, Docling*
github.com/LauraDiosan-CS/nara

- Led a team of 6 and architected the entire system: a document chatbot on a RAG ingestion pipeline handling any file type (PDF, DOCX, PPTX, XLSX, image OCR) with structure-preserving chunking.
- Improved retrieval recall with hybrid search (vector + full-text RRF), citing source chunks in every answer.

Education

"Babeș-Bolyai" University | *MSc in Software Engineering* Oct 2026 – June 2028

"Babeș-Bolyai" University | *BSc in Computer Science (GPA: 9.01/10)* Oct 2023 – June 2026

- **Competitive Programming:** 650+ problems solved on pbinfo.ro, Romania's largest algorithmic problem collection
- **Olympiad in Informatics:** Honorable Mention 2022, attendee 2021 & 2022

Certifications

AWS Certified Solutions Architect – Associate Sept 2026

Technical Skills

Languages: TypeScript, JavaScript, Ruby, Python, Swift, C/C++, SQL
Frameworks: Next.js, React, Ruby on Rails, Convex, Tailwind, Clerk
Infrastructure: AWS, Docker, PostgreSQL, Vercel, Git, CI/CD
AI & Agentic: Claude Code, Codex, MCP, multi-agent workflows, AI SDK, RAG, LLM evals

Languages

Romanian (native) | **English** (Cambridge Advanced, C1) | **German** (B2)
